

SANDVIK LH204 UNDERGROUND LOADER

TECHNICAL SPECIFICATION

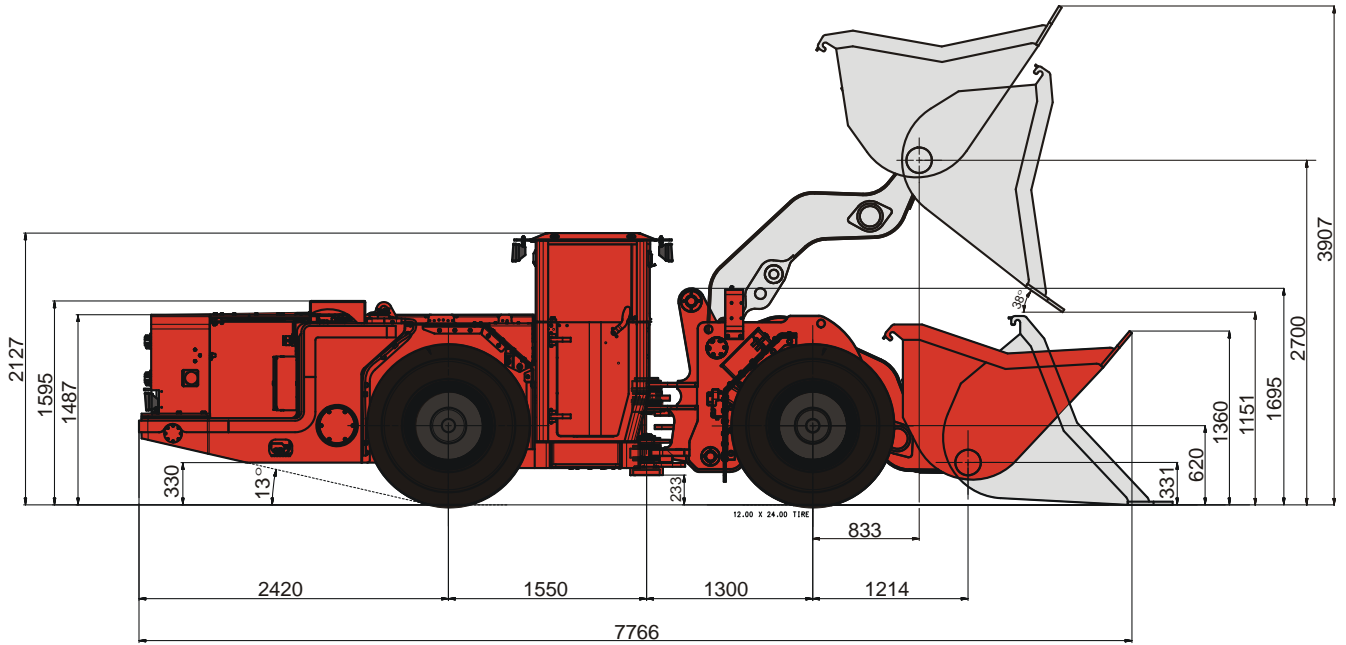

Sandvik LH204 is designed to give maximum tramming capacity in narrow mining and tunneling applications.

The hydrostatic drive system delivers high tractive effort for maximum penetration power in the muck pile while leaving space for a large operator's compartment. Sandvik LH204 offers excellent comfort and safety in narrow applications such as:

- Narrow vein ramp cut and fill
- Narrow vein open stope mining
- Construction of small tunnels and ramps
